Technical:

We do not normally bring public address (PA) equipment with us, but use the system in place. We can if needed arrange PA equipment (or extra mics etc) but please let us know.

We require: 3 Mics on boom stands and 3 input sockets (or DI's) - one for guitar, one for on-stage computer, one for piano. (Please let us know if your equipment does not accept Standard Jack plugs).
We would ask that house lighting is NOT dimmed between songs so that we can maintain audience contact.

Stage Plot

3 Mics on boom stands at front. of stage
3 DI inputs on stage for:
Dave's Guitar, Alan's Keyboard, Backing Tracks from iPad.

Promo and photos:
Information and photographs from the website may be reprinted in publicity material.

Publicity & ads:
In media advertisements, it is correct to use the phrase "former ELO guitarist". To avoid misrepresentation, any advertising text should NOT lend any special emphasis to the words 'Electric Light Orchestra' or 'ELO' and facsimiles of ELO's marketing logos should not be used.

CDs and books:
We would ask for the opportunity to set up a table to sell CDs and books after the performance. Also, if there is someone on hand to help look after the sales table while we are speaking to people, this is really helpful.

Getting there:
Please send directions to your venue (map etc), along with organiser phone number to:
gigs@scottmorgan.co.uk
